

Temple visitor complicit in murder

People are being educated on this bodily concept of life, and they are creating problems, and in order to solve the problems, they are becoming entangled in sinful activities. Just like this morning we were discussing about killing the baby's body within the womb, abortion. Because we do not know that the soul within the body of the baby... That cannot be killed. That cannot be killed. But that is also explained, that one who knows the eternity of the soul, he does not kill anyone, neither the soul is killed.

But we are creating problem. Because the soul has taken shelter in this body and the so-called medical science advising to destroy that body, that means he is becoming entangled. The person who is advising... I understand that one gentleman comes here, his wife is a medical doctor and her business is to check the pregnant wife, woman, and advise whether the child should be killed or not. This is the business.

So the situation of the world, due to ignorance of the soul they are creating so many sinful activities and becoming entangled.
